PROFILE

MSc Computing Science student with a strong foundation in Java-based software development, SQL, and applied machine learning. Built and delivered academic and internship projects using Android, Python, and cloud fundamentals. Seeking opportunities to contribute as a Graduate Software Engineer within an innovative technology environment.

EXPERIENCE

QA Automation Trainee

CloudQA | Jun 2024 – Aug 2025

- Developed and executed automated test scripts for web applications using Selenium WebDriver with JavaScript.
- Performed functional, regression, and UI testing to ensure high-quality software delivery
- Designed and maintained test cases, test scenarios, and test data based on application requirements.
- Collaborated with development teams to debug issues and improve application stability
- Performed cross-browser testing across Chrome and Firefox to ensure compatibility

Web Development Intern

OASIS INFOBYTE | Jan 2024 - May 2024

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Implemented UI components based on design requirements and user feedback.
- Improved cross-device compatibility through responsive layout techniques.

Cloud Computing Intern - AWS

Brain O Vision Solutions Pvt. Ltd | Jan 2023 - Jul 2023

- Provisioned Linux and Windows EC2 instances and configured basic IAM access controls.
- Applied firewall rules and basic encryption for secure cloud deployments.
- Gained hands-on experience with cloud infrastructure fundamentals and deployment workflows.

PROJECTS

Social Media Web Application. GitHub

FastAPI | Python, MongoDB, Firebase, Azure Blob Storage

- Developed a social media web application with secure user authentication, profile management, tweet posting, retweeting, and follow/unfollow functionality.
- Built RESTful backend features using FastAPI and MongoDB, including real-time timeline updates, search capabilities, and user activity management.
- Integrated Azure Blob Storage for image uploads and designed responsive user interfaces to improve accessibility and overall user experience.

Smart Navigation & Compass Application. GitHub

Android | Kotlin, Jetpack Compose, GPS, Sensors, Room DB

- Created a navigation application for Android platform with real-time GPS tracking, compass-based waypoint navigation and automatic location update based on device sensors.
- Established interactive compass interface with gesture controls, waypoint visualisation and zoom

functionality to improve navigation usability and user experience.

- Combined lifecycle-aware sensor and location management for optimizing app performance, battery efficiency and real-time responsiveness.

Deep Learning Classification & NLP Research Project. [GitHub](#)

Python | TensorFlow, Keras, BERT, CNN, LSTM

- Implemented and Evaluated deep learning models for image and text classification. Comparative study of CNN, LSTM, MobileNetV2, ResNet50 and BERT architectures on multiple datasets.
- Applied data pre-processing, transfer learning, fine-tuning and interpretability techniques to enhance model performance and analyze prediction behaviour.
- Used BERT for news topic classification, achieving up to 93% validation accuracy, and MobileNetV2 for image classification, achieving 90% accuracy on limited datasets

Meeting Room Booking Management System. [GitHub](#)

Web Development | FastAPI, MongoDB, Firebase, Azure Blob Storage

- Established a web application for booking rooms with real-time scheduling, occupancy monitoring, and calendar-based booking management.
- Set up secure authentication, booking validation and conflict detection to ensure reliable room reservation workflow.
- Together MongoDB and Azure Blob Storage for optimized room data, user bookings and image uploads.

Budget Tracker Mobile Application. [GitHub](#)

Android | Kotlin, Jetpack Compose, MVVM, Room DB

- Developed an Android application to track income and expenses with category-based budgeting.
- Implemented MVVM architecture with Room database for offline data persistence.
- Built real-time charts for monthly expense analysis, improving visibility into spending patterns.
- Reduced manual expense tracking effort by approximately 80% through automated summaries.

TECHNICAL SKILLS

Development Tools: Java, Python, SQL, Kotlin, C

Frameworks & Development: Android Development (Jetpack Compose, MVVM), REST API concepts, Object-Oriented Programming

Databases: MySQL, SQLite (Room)

Data & Machine Learning: Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering, Model Evaluation

Tools & Platforms: Git, GitHub, Android Studio, VS Code, AWS EC2 (basic), Linux

EDUCATION

Master of Science (MSc) in Computing Science

Griffith College Dublin | Sep 2025 - Sep 2026

Bachelor of Technology (B.Tech) in Computer Science & Engineering

MLR Institute of Technology | Nov 2021 - Sep 2025

CERTIFICATIONS

- AWS Academy - Cloud Foundations
- Python Programming - Networking Academy
- HackerRank - Java (5★)
